

CAPPED BARB SAMPLING PORTS Exclusively from QED!

Easy Port™ Fittings

The 1st capped barb fitting with a seal-tight cover.

Sample ports may seem like a little thing, but there are many issues with them. Metal barbs can be sharp and cause leakage by shredding the inside of push-on caps and tubing. Brass fittings corrode. Cheap, plastic barbs break or snap off. Quick-connect style fittings have o-rings that deteriorate and leak. And, port covers are easily lost or stolen by birds, they can also be tough to remove and frequently tear.

QED's Easy Port™ Fittings (Patent Pending) are made with tough, inert, fiber reinforced nylon, and they have a screw-on cap that seals tightly, making them bird-proof. The sample ports have heavy walls to reduce heat loss and freezing, and are UV protected for much longer field life. The cap seals tightly but can be easily removed with a simple twist, and it is tethered to the fitting so it cannot be dropped or lost.

QED Wellhead Retrofit Kit
Model: **40987**
Kit includes: 4 barbs – 0.25" NPT, 2 long, 2 short

Non-QED Wellhead Retrofit Kit
Model: **40986**
Kit includes: 4 barbs – 0.25" NPT, 4 short

Leak-proof Elastomeric Seal
Twist-on cap seals tightly reducing air leaks and resisting water buildup.

Bird-proof
New twist-on cap seals tight, combine this with heavy-walled construction and the entire fitting is bird-proof.
