

NEW SAFETY PRODUCT from QED

Pump Pull E™ Pump Extractor

Pull pumps faster from landfill and remediation wells to reduce downtime and increase productivity while protecting field personnel from injury

Removing pumps from landfill gas, leachate or groundwater remediation wells for cleaning or maintenance can be time-consuming, awkward and physically demanding. QED's Pump Pull E™ Pump Extractor is designed to make pump retrieval faster and easier -- ensuring the safety of your field technicians and speeding up the process.

The rugged, light weight aluminum and PVC system bolts quickly and easily onto 6" or 8" wells. Rolling the weight of the pump up and over the pulley wheel greatly improves the ergonomics for the worker and protects the tubing as well. Give your employees the tools they need to keep working and avoid Worker's Compensation claims!

Pump Pull E AutoPump® extraction tool.

Designed to bolt onto 6" or 8" flanges. Constructed of light weight aluminum with a 9 inch V channel pulley and easy-roll bearings. Includes set of 4 bolts.
